

*Floriani...
The Name that Means
Beautiful Embroidery!*

Floriani's Wet N Stick® Stabilizer 1.5 oz Tearaway or 2 oz Cutaway

Specifically designed for hard to hoop items! **Wet N Stick®** is an adhesive backed stabilizer that allows you to secure socks, neckties, bags, belts, bulky items and more so they can be easily and professionally embroidered. This unique stabilizer features a moisture activated adhesive on the back that will hold any item in place within the hoop. Avoid problems with ordinary peel-and-stick paper based backing that will gum up machine needles or messy spray adhesives that release harmful chemicals in to the air. Use the handy one inch grid lines to keep your design straight!

It's simple to use and only requires lightly applying moisture with a damp sponge, rag, foam paint brush, or envelope sealer (sold at office supply stores). Make sure the adhesive side is up. Do not over wet it! Lay the blank item on top of the adhesive and smooth out any wrinkles; then embroider and trim.

Now available in Cutaway (Black or White) for when it is necessary to stick down an unstable stretch fabric such as chenille, fleece, stretch collars or sweater knit.

Floriani's Medium Tearaway 1.5 oz

Medium Tearaway tears away cleanly to speed production and features a non-stretch, stable foundation. It can be used on any weight of woven with excellent results. Because it's made of top-quality materials using the wet-laid-non-directional process, only one layer is needed for most projects.

This product is easy to use. Once you've cut the appropriate size, it is hooped to the wrong side of the garment and sewn. Then securely rip off the excess edges from around the embroidery.

This tearaway is the recommended product when extra stability (floating) is needed with any other Floriani stabilizers for stitching denser or larger designs.

Floriani's Heat N Sta® Tearaway 1.5 oz

Heat N Sta® is a fusible tearaway that is perfect for stabilizing lightweight woven fabrics (quilt quality cotton, fine linen, shirt weight denim, etc.) that tend to shift during the hooping and/or embroidery process.

*To use: Fuse one layer of **Heat N Sta®** onto the back of the garment with a low temperature (260° F, wool setting) iron. Be sure the stabilizer is at least one inch larger than the outer parameter of the hoop to insure appropriate stabilization. Place the item in the hoop and embroider. Once the embroidery is complete, easily tear away the stabilizer!*

Floriani's Water Soluble Topping

When used as a topping on knits, terry cloth, fleece and other textured or high pile fabrics **Water Soluble Topping** creates a smooth embroidery surface. Stitches won't sink into the fabric; giving crisp definition and detail to your work.

*To use: Position one layer of the **Floriani Topping** on the surface of the garment once it has been hooped, secure with tape or pins. Embroider the design. Once the stitching is complete, tear away as much of the topping as possible. Any remnants can be removed with a damp cloth, sponge or steam from an iron.*

Floriani's Heat N Gone® Topping/Stabilizer

Use this remarkable 100% heat removable film as a topping or stabilizer on all fabrics that can withstand an iron temperature of 260°–300° F (120°-140° C). Great when giving a gift and you need instant stabilizer removal or when your fabric cannot withstand moisture. Trace intricate quilt patterns or designs that you want to free motion stitch for a perfect guide to follow on top of the fabric! Also an excellent choice for built in machine stitches such as quilting or heirloom.

To use as a topping:

*Place a piece of **Heat N Gone®** on top of the hooped item, bumpy side down, and secure with pins or tape. Once the embroidery is complete, tear away as much of the **Heat N Gone®** as possible. Place your heated iron to the top of the garment to remove the excess stabilizer. Be sure your iron temp is a least 260° F (120°C).*

To use as a stabilizer:

*Place a piece of **Heat N Gone®** within the hoop with the item to be embroidered. Use a piece at least one inch larger than the outer perimeter of the hoop. The bumpy side of the stabilizer should be against the fabric. Once the embroidery is complete, tear away as much of the **Heat N Gone®** as possible. Follow the steps above for removing any remnants left around the design.*

Floriani's Wet N Gone Fusible®

Wet N Gone Fusible® is for embroidery situations where absolutely no stabilizer can be left behind the design. Ideal when working on fabrics that are sheer and/or tend to shift and stretch when they are hooped or embroidered such as organdy, tulle, English netting, sheer silk or nylon, etc.

*To use: With a press cloth, iron the **Wet N Gone® Fusible** onto the back of the garment with a **dry, low temperature (260° F, silk setting)** iron. Be sure the stabilizer is at least one inch larger than the parameter of the outer hoop to insure appropriate stabilization. After the embroidery is complete, pull the stabilizer back to the design, trim away the excess and rinse. All that remains is the embroidered design.*

Also ideal for invisible/mock needle turn appliqué and yarn/thread scarves!

Wet N Gone

Fusible

Floriani's Stitch N Wash® 1.5 oz Fusible or Non-Fusible

Stitch N Wash® is ideal for open work type embroidery, decorative and/or heirloom stitching on light weight cottons, batiste and linen. It's unique because it is made up of both soluble and non-soluble fibers. By wetting the design or stitching once it is complete, **Stitch N Wash®** is easily torn away without distorting stitches or harming the delicate fibers of heirloom quality fabrics. Any soluble-fiber remnants will go away once the garment is laundered. The non-soluble fibers will stay within the embroidery even after washing.

***Stitch N Wash®** is ideal for Quilt Paper Piecing using our new 8.5" x 11" precut sheets. Try the fusible version for loosely woven fabrics that shift or stretch during the hooping or stitching process for the ultimate in stability!*

This product is not recommended as a topping.

Floriani's Wet N Gone®

This **fibrous** water soluble product is a superb choice for all lace work, free standing embroideries and/or appliqués such as flower pins, paper dolls, etc. Once the embroidery is complete, trim away any excess stabilizer, rinse it in water; the design is all that remains! Submerging is also an acceptable method of stabilizer removal. One layer should be sufficient for most designs. **Wet N Gone®** is noted for its clean rinse which results in a soft embroidery that can be worn against the skin.

Wet N Gone

Floriani's Wet N Gone Tacky®

This tacky version of **Wet N Gone®** is ideal for **hard to hoop** embroidery situations where absolutely no stabilizer can be left behind the embroidery. A perfect stabilizer choice when embellishing delicate sheers, silk scarves, textured organdy/organza, handkerchief corners, etc.

*To use: Simply hoop the **Wet N Gone Tacky®**, score the release paper with a pin to reveal the stabilizer, stick the item down, embroider and rinse the stabilizer away!*

Wet N Gone

Tacky

Floriani's Dream Weave® Fusible

When adding embroidery to your most delicate fabrics such as silk, satin, taffeta, lycra/spandex, chamois, etc. you can experience sheering or shredding. This occurs because the delicate fibers of the fabric are not strong enough to handle the constant needle penetration that occurs while embroidering. By fusing **Dream Weave®** to the back of the fabric before embroidery, it gives the garment body and the ability to handle heavier embroidery designs without changing the drape of the fabric. Because it is a permanent fuse, **Dream Weave®** is ideal for lining all types of fabrics in suiting and regular sewing or fuse it over the back of an embroidered design to cover scratchy stitches!

*This product is **not a stabilizer**; it is an important step to preparing delicate fabrics for embroidery.

Available in white and black.

Floriani's Perfect Stick Tearaway®

With Perfect Stick, embroidery in almost any area is achievable! Enjoy quality stitching with no residue build up or gummy needles. Perfect Stick is ideal for hard to hoop items such as backpacks, collars, napkin corners, or socks. Also use for fabrics that can be damaged by the hooping process, a.k.a. Hoop Burn; fabrics like leather, velvet, ultra-suede and satin. To use place one piece of this revolutionary stabilizer into the embroidery frame, remove the release paper and stick your item to be embroidered into place, it is that simple! With Perfect Stick you will enjoy the stability of a firm yet flexible stabilizer that will support all types of embroideries on most fabrics.

Floriani's Stitch N Shape®

Creative opportunities are limitless with this remarkable product! Use Stitch N Shape when creating tote-bags, purses, placemats, fabric bowls/boxes, paper dolls and hat brims, etc for the ultimate in firmness yet shapeable flexibility. Use the fusible versions to apply fashion fabric to one or both sides! You can stitch or embroider directly through it! **Stitch N Shape®** is wash and dry friendly and can be reshaped by steaming. Create unique picture frame mats by painting, stitching, or embellishing directly on it. Try our plain, single or double fusible versions for your next craft or special embroidery project!

Floriani's Cutaway Medium – Fusible or Non-Fusible 2oz

When stability is the priority, one layer of **Floriani's Cutaway Medium** offers the no-stretch properties you need to provide support for designs larger in size and with a medium/high stitch count on most weights of knits, sweaters and wovens. Avoid messy spray adhesives by using the Fusible version of Cutaway Medium. It is the ideal solution to better embroidery if you are having problems with the garment stretching out of shape and/or shifting during the hooping or stitching process.

Cut an appropriate size of stabilizer and fuse it to the wrong side of the fabric (use a square at least one inch larger than the hoop size and a low temp, silk setting on your iron). Once the stabilizer is fused into place, hoop the garment and embroider. Once sewing is completed carefully trim away the excess for clean finished look.

Floriani's No Show Nylon Mesh - Fusible or Non-Fusible 1.5 oz

One of the most difficult problems with traditional cut away stabilizers is having the ugly square show through light colored fabrics. This problem is solved with **No Show Nylon Mesh** which is made of soft, sheer, translucent embossed nylon. This versatile mesh does not require multiple layers, which adds bulk. It is invisible to the eye when viewed from the front.

Eliminate the need for messy spray adhesives and enjoy easier hooping of stretch fabrics by using the Fusible version of this product.

By pressing the mesh on to the back of the garment (use a square at least one inch larger than the hoop size and a low temp, silk setting on your iron), the fabric is held secure and will not shift while hooping or embroidering. Also use to stabilize delicate fabrics such as silk and satins for embroidery and handwork.

Colors include white, black and beige.

Floriani's Appli-kay Wonder®

Turn your embroidery designs into appliqués or patches with **Floriani's Appli-kay Wonder®**. This fusible webbing has a pressure sensitive side for easy re-positioning. Use to create beautiful traditional appliqué for quilts, home dec and garments.

*To use: Trace your image or shape onto the protective release paper side of **Appli-kay Wonder®**. Fuse the soft side of the product to the wrong side of the fabric or item to be appliquéd. Cut out the shape and peel back the release paper, this exposes the sticky side. Position the appliqué as many times as you need and then press in to place for a permanent bond. Finish with a satin or decorative machine stitch.*

Floriani's Template Tearaway®

Use this semi-translucent, sticky tearaway in your ink jet printer to print off hoop/design templates from your embroidery software. After the template is printed, stick it onto the garment or home dec item for perfect embroidery placement!

Floriani's Template Tearaway® makes multi-hoop designs a snap to embroider. Manipulate embroidery designs by rotating and combining them to make one large design. With Floriani Template Tearaway, you can achieve precise placement faster and easier! Ready to print 8 1/2" x 11" sheets, 25 per pack.

*For a picture tutorial on this product visit www.rnkistributing.com and click on the projects tab.

Floriani's Press Cloth

A recently revealed secret of the Floriani family is to "heat set" the embroidery design once it is sewn. Using **Floriani's Press Cloth** will protect the embroidery thread from the surface of the iron while "setting" the color and stitch formation. Your embroidery will be perfect after it is laundered.

Also use this press cloth in conjunction with any of Floriani's fusible products to protect the surface of your iron.

Now you can own the press cloth used and recommended by Walt himself!

Floriani's Heat N Sta Fleece® and Heat N Sta Light Fleece®

Add dimension to your embroidery and quilting projects with **Floriani Heat N Sta Fleece®**. Create soft home dec items such as placemats, table runners and crib quilts. This unique product is similar to traditional quilt batting only with a fusible side to keep the fleece in place while stitching through it! **Heat N Sta Fleece®** is ideal for machine embroidered or T-Shirt quilts as it does not have to be quilted to maintain the fibers of the batting. It is machine washable, dryer and/or drycleaner safe. Also available in a light version which is ideal for quilted vests, jackets and baby quilts. Enjoy the loft without unwanted weight or bulk!
